DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2 and 11-14, drawn to a DNA base sequencing method (using luciferase), classified in class 435, subclass 91.1.
 - II. Claims 3-10 and 15-23, drawn to a DNA analyzing system, classified in class 435, subclass 6.
 - III. Claims 24-26, drawn to a DNA base sequencing system, classified in class 422, subclass 68.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method as claimed may be practiced using gel electrophoresis and a DNA sequencer (page 1 of Specification).
3. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

Art Unit: 1623

806.05(e)). In this case the method as claimed may be practiced using a sample DNA hybridized with a DNA probe using a DNA chip (page 2 of Specification).

4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Invention II is drawn to analysis and Invention III is drawn to synthesis (different modes of action and effect). Indeed synthesis need not include analysis and analysis may be performed before or after synthesis.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
